

## I N S T R U C T I O N S

The following instructions will help the fishing teams to record the information related to the fish caught as part as the **Wemindji Coastal Fisheries Program 2011**. For each fish caught, the name of the fishing camp, the date, the species, the fish total length and the area where the fish was captured will be noted.

<b>FISHING CAMP :</b> Name of the fishing camp : (Old Factory or Goose Island or Rabbit Ridge, etc.)
--

(Old Factory or  
Goose Island or  
Rabbit Ridge, etc.)

**FISH SPECIES :**

Please identify with a ☒ the captured species.

---

☐ Lake Whitefish  
☐ Cisco  
☐ Brook Trout

☐ Lake Whitefish  
☐ Cisco  
☐ Brook Trout

**FISHING AREA :**

In relation with the geographical map (included in the monitoring kit), the fishing team identifies the different fishing sites on the map by placing an **X** or a **(●)** on the designated fishing area. If the waterbody is known, but not identified on the map, please note it's name on the monitoring sheet.

[illegible]

**DATE :**  
Month and day of  
the fishing activity.  
(mm/dd)

**TOTAL LENGTH (inches)**

The total length of the fish is measured from the head to the extremity of the fish's tail .

For the fishes with a forked caudal fin, the two fins are brought towards the center in order to obtain a maximal length size.

For the fishes with a forked caudal fin, the two fins are brought towards the center in order to obtain a maximal length size.
